# Illuminating Engineering Society notes

## Index Volume 6, 1974

| | | Page |
|---|---|---|
| Presidential address: New lamps: their suitability for interior lighting | A. H. Willoughby | 1 |
| Tunnel entrance lighting—the effect of fixation point and other factors on the determination of requirements | K. Narisada & K. Yoshikawa | 9 |
| Translucent ceramics as lamp envelopes | M. A. Parrott | 19 |
| Terminology for flashing light signals | J. G. Holmes | 24 |
| National Illumination Committee of Great Britain Report | | 36 |
| Designing and testing to BS 4533 | J. S. Barnes & G. Hodgin | 53 |
| Effect of sodium/mercury ratio and amalgam temperature on the efficacy of 400 W high-pressure sodium lamps | P. L. Denbigh | 62 |
| Lighting of hospital circulation spaces which are open to bed bays | A. H. Cockram & J. B. Collins | 69 |
| Assessment of discomfort glare in motor vehicle lighting | H.-J. Schmidt-Clausen & J. Th. H. Bindels | 79 |
| Responses to light and radiation: a guide to units, conversion factors and computations | J. S. Preston | 89 |
| Midpoint ratio calculations for linear luminaires | H. E. Bellchambers & R. H. Symons | 95 |
| Economic life of incandescent lamps for domestic lighting | S. J. Prais | 101 |
| Daytime lighting of buildings: report of an IES Symposium | | 104 |
| Trotter-Paterson Memorial Lecture: Lamps, light and cosmology | A. H. Willoughby | 119 |
| Human sensitivity to flicker | G. W. Brundrett | 127 |
| Airfield lighting | D. J. Bridgers & H. Richards | 144 |
| Visual aspects of sunlight in buildings | E. Ne'eman | 159 |
| Quantitative data on daylight for illuminating engineering | J. Krochmann & M. Seidl | 165 |
| Road lighting and the role of central government | J. T. Duff | 183 |
| Certification of lighting equipment | R. C. Kember & J. E. Greenhill | 197 |
| Consistency and variation in preferences for office lighting | P. R. Tregenza, S. M. Romaya, S. P. Dawe, L. J. Heap & B. Tuck | 205 |
| Some aspects of the tin halide molecular arc | P. C. Drop, J. J. de Groot, A. G. Jack & G. C. J. Rouweler | 212 |
| Luminance uniformity and legibility of traffice signs | S. Dahlstedt | 217 |
| Illuminance, difficulty, complexity and visual performance | P. R. Boyce | 222 |

### Research Notes

| | | |
|---|---|---|
| Improved paint coating for photometric integrators | M. Nonaka | 30 |
| New class of phosphors for 'de luxe' fluorescent lamps | J. M. P. J. Verstegen | 31 |
| A desk top heliodon | C. Cuttle | 32 |
| Illuminance ratios as a constraint on utilance | J. A. Lynes | 172 |
| New artificial 'overcast and clear' sky with an artificial sun for daylight research | R. Kittler | 227 |
| Discomfort glare from ceiling mounted luminaires | P. C. Betts & D. C. Pritchard | 230 |

**Abstracts** 43, 112, 175, 233

**IES notes** 50, 117, 181, 242
